AROMATHERAPY

Aromatherapy is a form of alternative medicine that uses volatile plant materials, known as essential oils, and other aromatic compounds for the purpose of altering a person's mind, mood, cognitive function or health. Some of application of aromatherapy are:

Topical application: for general massage, baths, compresses, therapeutic skin care.

Bath: This method could be used for having a wonderful and a relaxing experience. Add few drops of essential oils to the Bath water and soak in.

Herbal Tea: is simply the combination of boiling water and dried fruits, flowers and herbs. Tincture is an alcohol-based derivative of a fresh herb and other natural plant material, used primarily as an alternative medicine or dietary supplement.
